

All companies over 50 employees are required to comply with the Patient Protection and Affordable Care Act (PPACA) and for ADP to generate the annual 1094c and 1095c reporting, ACA hours from the prior payroll vendor is required. While extracting ACA hours, most clients decide to convert prior check history to their new ADP solution. We Convert your former payroll provider's payroll registers into ADP format. Conversion of prior check history to a central point within the ADP Workforce Now system provides companies with the ease of

check detail history dating prior to the conversion with ADP. Once data is imported, it provides ability to easily retrieve historical employee check detail, including hours, earnings, deductions and net pay. Payroll administrators can quickly respond to employee requests, audit requests, and run reports needed for Workers Compensation insurance obligations. ADP will generate a Statement of Work (SOW) and the ResNav team will work directly with the company to extract the data and assist in uploading it to the new ADP company code.

Features

Compliance with
PPACA

Check history files will be
formatted specifically
for ADP

1094-C and 1095-C
Reporting
